To record the singular incidents that occurred around me, and sketch the striking histories which awakened my interest, was a favorite empleyment culty a professional career of nine years. Out of the many colored webs of life thus collected the narratives that compose this volume are woven. Fiction has leat but few embedibility touches. Truth is left to proclaim her cown strangeness. Should his work achieves the object contemplated, its readers will receive a more correct impression of some un laureled absorvers for the public amusement than is generally entertained. Between them and the every-day word the curtain of prejudice has fallen in impensitable folds. From is fatal shadow those alone who climb to the highest pinnacles of fames merre. Yet among the most lowly of the proactibed band there are many whose lives bear witness that Heaves plants its fixeers and restters its pearls in unexpacted places. Look for them, you who judge read by, before you pronounce that they have no existence there.

Judicial tyranny is something comparatively new in our history. On the integrity and purity of the Bench, we have been accounted do confecutive to rely for the protection and seconity of our persons and our property. Events, however, have recently transpired which have materially shaken public ordened in the eatery of that retistince. The various man-hunting expeditions which have, within the last few years, been made into the North, and the numerous trials, including the Jurry, the Sins the Burns, and similar cases, and the crowning act of infamy generated by

JULGE KANE UPON PASSMORE WILLIAMSON, have excited the protoundest indignation and alarm. The pullishers besieve, therefore, that this amply attested and clearly drawn record of what Judges have done, will lead the people there what, if unchecked, Judges may still do.

The Publishers offer Alligroup as one of the most genial and natural autobiographies that ever fell from the press. Such a fascinating work cannot fail to create as much interest in this country as it has created in England. This charming tale forms the eighth complete work of the Standari Library of Novels, the eighth complete work of the Standarf Library of Novels, and must add additional favor to that very pepular sectes. We submitted an early copy of the work to a distinguished library gentleman for his critical opinion, who says in his reply: "According to your request I have read Alleford, of which I think very highly. It is one of that class of domestic rovels the scone laid among the middle classes, and the interest and effect produced by perfect truthfulness, shrowd observation, and nice defineation of character; and a narrative of events failing within the probable range of every-day life, for which the modern Scottish novellats have become so justly celebrated. This is a tale of trial, temptation, weakness, and sin, redeemed by beauti-ful self-racrifice, undaunted endurance, and unswerving love in humble life. There is not one attempt at fine writing, not one

effort at a scene, one trick of stage effort; yet it keeps sho reader constantly alive to the keenest excitement, which never flags until the narrative of sorrow finds its own conclusion. The

pertraiture of character throughout is admirable, and nothing in modern fiction is much finer than the tron obduracy of Donald

As an evidence of the estimate placed on this truly excelled production by the English critics, we append the following Facm file Leading Loudon Journals:

"Allieford is a capitating story—a story which it is a privilege to read, and a pleasure to remember. The characters are shapply conceived and vigorously portrayed. In the touching nor after of domestic incidents, and in the tithful portraiture of the fireside affections, the author displays a power which holds resistless away over the sympathies of the reader."

"Among the fictions of homely, domestifile, in which truth is to compensate for the absence of ideal beauty, Allisford deserves to rink high. We know not the work of ficting that has more engaged us; it is fully equal in power and interest to "The Initials," of which it often reminds us. We have pleasure in commending it to our readers." [The London Athensum.

"A work abounding in fascination of an irresistible kind. Among the entire range of modern literature in the category to which it appertains, there has been nothing superity to it recently given to the public."

"A delightful tale—full of affecting incident, brilliant description, and profound reflection." [London Observer.

"A dealightful tale—full of affecting incident, full limit description, and profound reflection." [The Standard.

"The reflex of life is so true, that the book throughout excites the interest of reality." [London Spectator.

"This comming novel is one of the autobiographical kind, to'd in a cells hafully entertaining style. It does full justice to the reputation already galned by the author."

This book, with its charming stories, superb libustrations and elegant briding will prove the most attractive work for a holiday present published this season. The original legends, which the editor has worked up and retold in a glowing and attractive style, are derived from sources placed at his disposal by Heary it. Schoolcraft, seq. The work is superby illustrated from drawings made by John McLeran, and engraved by Asthony in a style which for elaborate finish and artistic excellence has been rarely equaled. A glance at the following table will savere the reader that the stories do not rest of the term-hawk and scalping knife but that they are transfers of those beautiful mythological traditions which are found only among the Indians:

By CALES STARSUCK.

10.1, 12mo. Price, #1 25.

The events of this volume are founded on facts. Many persons now residing in Connecticut will recognize not only the incidents, but many of the personages which are introduced into the story. The characters in many respects are faithful portraitures of individuals now living, who played in real life the parts assigned them in this volume. Caleb Starbuck, the suther, is evidently an "old salt," and the story savers much of the interest of the forecastic.

Why I should have been so ex pably remise in my duty to the public I cannot really say, except it is that I sell the above work already as fast as I can print it. It is the joint production of a men and his wife who passed through the seven degrees of Mormostem. It would seem from their statements that they have, both the man and the woman, been married to any quantity of wives and husbands, until, having became sated, they remterchanged first loves, and escaped from their fallow-polygamists. It is a little singular, however, that they still clied with tenacity to what they term the pare tenets of the faith. They reject spiritual-wifery only.
